EDUCATION

Rutgers University New Brunswick | New Brunswick, NJ

May 2028

B.S. in Data Science and Business Analytics and Information Technology

Relevant Courses: Data Structures, Mathematical Theory of Probability, Linear Algebra, Statistical Methods in Business, Database Systems, Discrete Structures

TECHNICAL SKILLS

Programming: Python, SQL, Java, JavaScript, R

Data & Analytics: PySpark, Power BI, Tableau, DAX

Cloud & Databases: Azure Synapse Analytics, Azure Blob Storage, SQL Server, MySQL

Development: React.js, Node.js, Git, GitHub, Jira

EXPERIENCE

CompoSecure LLC | Somerset, NJ

June 2023 - Present

Business Intelligence Analyst Intern

- Designed and optimized scalable ETL pipelines using PySpark for large-scale data processing, reducing processing time by 25% and improving data quality across enterprise datasets
- Migrated 200+ datasets into distributed data pipelines, personally delivering 70+ conversions and increasing data refresh frequency by 5x with near real-time reporting
- Built automated SSRS and Power BI reporting pipelines for audit and workforce analytics, delivering high-priority reports on recurring schedules and reducing manual reporting time by ~80% in key workflows while improving accuracy in business-critical reporting processes
- Led redesign of core data architecture during post-acquisition integration, improving system scalability and reliability while reducing processing times by 30% and supporting 2x data growth

PROJECTS

RUTraveling – Full-Stack Travel Recommendation Platform | JavaScript and Python

April 2026

- Built a full-stack travel recommendation platform generating 80+ ranked destinations using real-time data and user-defined preferences, enabling faster and more informed decision-making
- Integrated external APIs to power real-time data retrieval and dynamic cost analysis, improving platform responsiveness and user experience
- Developed ranking and filtering algorithms to deliver personalized recommendations by synthesizing multiple live data inputs

Student Performance Prediction Model | R, Random Forest, Decision Trees

April 2025

- Developed a predictive model that improved performance accuracy from 75% to 83%, identified the top 5 drivers of student outcomes, and enabled recommendations to better target tutoring, identify at-risk students earlier, and improve academic support
- Engineered features and evaluated multiple models to optimize predictive performance and model reliability

LEADERSHIP & INVOLVEMENT

Vataldham Temple | Somerset, NJ

June 2017 - Present

Volunteer

- Led volunteer teams in coordinating community events and activities, ensuring smooth execution and enjoyment for participants.
- Mentored new volunteers, helping them get involved, feel comfortable, and stay engaged within the community
